# A Word from the Developer

Fakhta Church Management System

Pastor, Entrepreneur & Software Engineer

**Stephan Raza**

(Masters in Computer Sciences, BTH)

Greetings in Christ!

Thank you very much for your interest in **Fakhta Church Management System**.

For a long time, it has been my desire to establish a unified digital platform for the local and overseas congregations of the Church of Pakistan. The goal is to make all modern facilities related to ecclesiastical management accessible from every corner of the world, 24/7, following the pattern of Western churches. The establishment of "fakhta.org" is a significant milestone in this journey, and the Fakhta Church Management System is a vital link within it.

You must have seen a practical example of a computerized management system in the form of a **Point of Sale (POS)** at a departmental store or brand shop.

In such systems, the entire data of the store—and even its franchises spread across multiple cities and countries—is controlled from a single server under an integrated system. The Fakhta Church Management System has been developed on a similar structure and framework; however, with a non-profit objective, we have made a special effort to keep Christian, ecclesiastical, and spiritual values in mind.

In the preparation of the Fakhta Church Management System, several world-renowned church management systems were considered as case studies, with **Tithe.ly** being at the forefront. However, this is only the first step of the ladder, and with your cooperation, we will surely succeed one day in providing software of this caliber to every church in our beloved homeland.

# What is the Fakhta Church Management System?

---

Today's world is digitalizing with extreme speed. In this modern era, no institution—whether secular or business-oriented—can stay aligned with current demands without going digital. It is a welcome and promising reality that the Pakistani Church, its leaders, and Christian institutions are also moving forward in this advancement according to their respective capacities.

To strengthen and refine this progress, "**The Paraclete Inc.**" (a Karachi-based Christian software house) has undertaken the task of introducing the "**Fakhta Church Management System**" for local and overseas Pakistani congregations under its flagship project, "**fakhta.org.**"

The Fakhta Church Management System is, in fact, an online software consisting of **18+ modules**, developed after two years of continuous and tireless effort. As the name suggests, this software is an integrated system designed to handle and manage ecclesiastical and ministerial administration and activities digitally. It provides high-level technical assistance to contemporary Christian leaders—especially the new generation—enabling them to secure and control data related to members, families, worship services, programs, staff, finances, and various other matters more quickly, easily, and sustainably on a single server.

While you will find a beautiful blend of numerous technical features and details within the Fakhta Church Management System, its greatest advantage is that it is **entirely online**, allowing you to access it from any device, anywhere, and at any time. Among other facilities, options such as lightning-fast search and data filtering are extremely useful and exceptionally easy to use.

# Why should you use the Fakhta Church Management System?

---

In preparing the Fakhta Church Management System, a framework has been designed by keeping in view the general requirements of the global Church and the specific needs of the Church of Pakistan. It provides technical assistance to your church, ministry, or Christian institution in the following areas:

- **Secure Online Record Keeping:** Save all records of your members, families, and staff on an online server that you can access from any device, anywhere in the world, at any time.
- **Effective Management:** Maintain a more effective account of church growth, personal and family data, administration, salaries, utility bills, and income and expenditure information.
- **Detailed Oversight:** Maintain a deep and detailed view of your activities with the help of the software.
- **Instant Search:** Locate any required record immediately.
- **Multi-Branch Control:** Manage the accounts and data of various branches from a single server.
- **Financial Tracking:** Securely record offerings, tithes, and funds.
- **Digital Reporting:** Generate professional digital reports.

In simple terms: which service took place when and where, who delivered the sermon, what was the topic, which hymns were sung, how much offering was collected, what were the expenses, and what was the net income, etc.

# Salient Features (1)

---

01

Developed with the latest programming languages

02

For all churches & denominations

03

Essential for contemporary and new generation leaders

04

Cloud-based, Google OAuth security integrated & enabled

05

Bilingual: English & Urdu (Urdu is a paid module)

06

Cloud-based, Google OAuth security integrated & enabled

07

The ultimate, technical & digital solution to all the Church & Ministry related issues and hurdles w/ 20+ modules to accommodate almost all your needs

# Salient Features (2)

---

08

A one-of-its-kind software for Pakistani and overseas Churches

09

Easy like WhatsApp

10

Works best on all devices, 24/7 access from anywhere

11

Backup (PDF, JSON & Excel Sheet)

12

Data sorting and filtering through diverse techniques

13

Full technical support

14

Pakistan's first and the largest Church Management System brought to you after 2 years of brainstorming, coding and interface designing
